# XL PRO™ VideoProbe®

## XL PRO Plus VideoProbe®

Inspecting the GE90 engine with the XL PRO VideoProbe

The XL PRO and XL PRO Plus VideoProbe system are the world's most advanced tools for remote visual inspection. Each XL PRO system is designed to be portable, easy to use and has unparalleled imaging capabilities. Used in a wide range of industry applications, the XL PRO system has become the top choice for remote visual inspection needs at businesses around the world.

### XL PRO Features

- 3.5 in. Floppy drive
- 16MB internal Flash memory

### XL PRO Plus Features

- Two hours of DVD-format, MPEG2 full-motion video
- CompactFlash® digital storage media
- USB Streaming Video port
- 64MB internal Flash memory

### XL PRO Common Features

- Integrated Temperature Warning System
- Probe interchangeability with six diameters available
- Complete portability with AC, DC or battery operation
- The only video borescope with three measurement modes
  - ShadowProbe®, StereoProbe® and Comparison
- iVIEW™ image management

# Hardware Features

The world's smallest VideoProbe with StereoProbe® measurement – 3.9 mm diameter. (Shown actual size).

### A: Processor / Light Source

The Processor/Light Source combines a brilliant 50 watts of Metal-Halide illumination with a sophisticated computing platform for the XL PRO™ system. It is available in two models with the following features:

#### XL PRO Plus

- Removable CompactFlash® data storage for Video and Still images
- Full-motion MPEG1/MPEG2 audio/video recording and playback
- USB streaming video port
- Internal 64MB Flash memory

#### XL PRO

- 3.5 in. Floppy drive for still image storage
- Internal 16MB Flash memory

### XL PRO Plus

### XL PRO

### B: Portable Shipping / Operating Case

A unique dual-purpose shipping and operating case protects the XL PRO system from possible transport damage, and doubles as the operating station. Operate the VideoProbe® system in or out of its case.

### C: Hand-Piece

The ergonomic Hand-Piece provides one-handed operation with intuitive joystick articulation, large control buttons and a high-resolution color LCD. The innovative Hand-Piece features:

- Joystick for All-Way articulation and menu control
- Shock-mounted LCD monitor
- Integrated microphone
- Insertion tube torsional strain-relief
- Impact-absorbing rubber bumpers

### D: Probe

From the world's smallest borescope with All-Way articulation and StereoProbe® measurement capability – the 3.9 mm diameter – to the 6.2 mm VideoProbe XL PRO system with an internal working channel, our interchangeable probes are built to withstand almost any environment. Ruggedly constructed, the probes are protected by:

- Titanium camera heads
- Quad-wall insertion tube construction
- Tungsten braid over entire insertion tube and bending neck
- Force-limited, servo-motor articulation

### E: All-Way® Probe Tip Articulation

### F: Backpack and PowerBar

For added portability, the XL PRO system can be carried in a backpack and powered by the PowerBar™ battery pack.

### G: Portable Case

Easily carry two probes and accessories to your inspection site using portable case options.

## Probe Diameters

(shown actual size)

# System Features

## Temperature Warning System

The only video borescope product with an integrated Temperature Warning System to prevent damage and protect your investment. With a Temperature Sensor built into the camera, this system provides three levels of on-screen temperature conditions to prevent damage from high-temperature inspection environments.

## Interchangeable Probes

Six diameters available to meet a variety of inspection requirements – 3.9, 5.0, 6.1, 6.2, 7.3, and 8.4 mm.

## CompactFlash® Storage

Removable CompactFlash digital storage media for Full-Motion Audio/Video and Still-image capture. Record and playback over 2 hours of MPEG2 video on a 2GB CompactFlash card. Accepts any size CompactFlash Type I card.

## USB Video Port

Stream live video from the XL PRO™ Plus to your personal computer for viewing or archiving.

## Complete Portability

Go portable with the PowerBar™ battery pack, available DC power kits and two choices of backpacks.

# Software Features

## Software Capabilities

File management, image documentation, and defect measurement are just some of the advanced features accessible with the iVIEW™ platform.

## Pentium®-Class Processor

An embedded Pentium-class processor manages a real-time, multi-tasking software operating system, giving the XL PRO system the power to perform multiple tasks concurrently.

## iVIEW™ Image Management Platform

The XL PRO™ VideoProbe® system is powered by Everest RVI Products and Services exclusive iVIEW image management platform. Powerful and intuitive, iVIEW provides all controls and functions for the VideoProbe system, with features that allow you to manipulate and store video and still images for precise and easy documentation.

## Measurement

Three modes to meet your measurement challenges. The only video borescope to offer ShadowProbe®, StereoProbe® and Comparison measurement capabilities. ProView image enhancement and zoom window features allow precise cursor placement.

### ShadowProbe Technology

Use the ShadowProbe's patented shadow projection triangulation method to accurately perform Distance, Skew, Depth, Area, Multi-Segment Length, Point-to-Line and Circle Gauge measurements.

### StereoProbe Technology

StereoProbe measurement is essential for inspecting curved and irregular surfaces. Using dual-image technology, views are taken from two angles and automatically analyzed for maximum accuracy. StereoProbe measurements include: Length, Point-to-Line, Depth, Area, and Multi-Segment Length.

### Comparison Measurement

Built-in Comparison Measurement software lets you measure items in an image field using known dimensions of another object in that field. Comparison measurement types include: Length, Point-to-Line, Area, Multi-Segment Length and Circle Gauge.

ShadowProbe Measurement

StereoProbe Measurement with 3x Zoom Window

Comparison Measurement

StereoProbe with ProView Image Enhancement

The accuracy of all XL PRO measurement systems are verified with calibration equipment that is NIST (National Institute of Standards and Technology) traceable.

File Manager for Thumbnail View

On-Screen Keyboard for Annotation

Split Screen View

International Language Support

## XL PRO™ Software Features

### Intuitive Drop-Down Menu System

Access the advanced feature set via a drop-down menu system.

### Multi-Language Interface

Only the XL PRO system allows you to choose from over nine language options for operation and documentation.

### Multi-Function Joystick

The joystick controls probe articulation, menu navigation and measurement functions.

### On-Board File Manager

The file manager lets you create and name file folders, then move and store files between folders in internal or external memory.

### Integrated Text and Graphics Control

Use an external keyboard or the hand-piece joystick to place text annotation, graphic call-out arrows or company logos onto any live, frozen or recalled image.

# Applications / Industries

The XL PRO™ system is designed to meet inspection needs across a wide range of industry applications. Whether it's the precise standards of aircraft engine safety compliance, navigating the narrow confines of process piping, or conducting covert surveillance, the XL PRO VideoProbe line offers the right tool for the right application. With the industry's widest selection of optical tips, probe lengths, diameters and measurement capabilities, you can feel confident the XL PRO system is up to the task.

XL PRO video borescopes help aviation maintenance personnel efficiently inspect engines on- or off-wing

- **Aviation:**  
Commercial, Military, OEM, MRO and Business
- **Power:**  
Nuclear, Fossil, Combustion Turbine, Combined-cycle, Hydro and Wind
- **Process:**  
Offshore, Refining, Chemical, Distribution/Transportation, Food, Ultra-pure and Water Treatment
- **Automotive:**  
Manufacturing, Service and OEM
- **Other:**  
Shipping, Law Enforcement

Industrial gas turbine Inspection

Industrial probe inspection of a refinery fin-fan heat exchanger

VideoProbe® inspection of an electric power plant HP Feedwater heater

Law enforcement training exercise using the Covert VideoProbe system

Windmill gear box inspection

XL PRO™ case hoisted by cable to top of windmill

# Specialty Probes

## Specialized Applications

GE Inspection Technologies knows there are situations that require unique tools to get the job done right. That's why it has developed a range of specialty video boscopes that are built to serve industry-specific requirements. For more information on specialty video boscopes, please go to [www.ge.com/inspectiontechnologies](http://www.ge.com/inspectiontechnologies).

### LongSteer® VideoProbe® System

The world's longest articulating VideoProbe system! Available in lengths up to 30.5 m (100.0 ft.), the LongSteer VideoProbe system is ideal for long runs in small-diameter piping. This probe is available in 6.1 mm and 10.0 mm diameters.

### Industrial VideoProbe®

A probe for the darkest, wettest industrial environments. The Industrial VideoProbe system uses interchangeable, water-resistant lenses, combined with a full 360° ring of illumination fiber optics and adjustable tip focus to obtain brilliant, clear images in large pipes and vessels.

#### Mini-Probe

A custom probe for narrow passages 2.92 mm wide

### Custom Probes

With over 20-years experience at RVI product customization we are committed to providing our customers with the tools they need to get the job done. Just provide us with the details and our Custom Solutions Group will deliver an answer.

### High-Purity-Weld VideoProbe

This probe allows for easier manipulation in weld inspection environments. It has a non-articulating supple bending section at the tip that enables insertion through tight pipe bends and 360° inspection of orbital welds. An advanced system pendant which provides additional optional features, including measurement capabilities is available.

SWAT team training exercise using a Covert VideoProbe system

## Covert VideoProbe

Particularly suited to law enforcement and surveillance operations, this probe incorporates a long-exposure mode for superior viewing in low-light situations. Dedicated controls allow the operator to switch off the lamp and lower the speed of the ventilation fan for diminished noise and reduced detection. The Covert system can also be carried on a Covert Backpack and powered by the PowerBar™ battery pack.

## External Retrieval Tools

External retrieval tools are available for other probe tip diameters. The fork and tine tool is shown here.

Retrieval Tools for 6.2 mm and 7.3 mm diameter probe with internal working channel

# Modular System and Accessories

# PC Connectivity/Applications

## Advanced User Interface

### iVIEW™ Remote XL PRO™

Allows complete remote control of the XL PRO™ system, from across the room or across the world. With the XL PRO system connected to a PC at the inspection site, a remote user with an internet or other network connection can control all menu functions, probe movements and camera capabilities to view, zoom and measure defects.

### iVIEW PC

FREE software that extends iVIEW capabilities to your PC. Using a Microsoft® Windows® interface that duplicates the XL PRO system menu functions, users can download workable images to any PC. Manipulate, re-measure, compare, annotate, e-mail images to other locations, review inspection results and automatically generate reports in Microsoft Word format. Download iView PC at [www.ge.com/inspectiontechnologies](http://www.ge.com/inspectiontechnologies) or contact Remote Visual Inspection Customer Service for the CD-ROM.

## Software

<b>Operating System:</b>	Real-time multitasking
<b>User Interface:</b>	Simple drop-down menu-driven operation
<b>File Manager:</b>	File and folder creation, naming, copying, deletion
<b>Audio Data:</b>	PC compatible, 15 second files (.WAV format)
<b>Image Controls:</b>	Handset brightness control – gain and exposure
<b>Image Management:</b>	Single button freeze frame, Full or Split screen
<b>Exposure Control:</b>	Automatic or Manual (34 msec to 8 seconds)
<b>Digital Zoom:</b>	1X to 3X – Continuous and 5-Level Stepped
<b>Still Image Formats:</b>	BITMAP or JPEG (Super High, High or Low .JPG)
<b>Video Record Formats:</b>	MPEG2 (High or Low), MPEG1 (High, Med or Low)
<b>Annotation:</b>	Text and Graphic screen overlays and custom logos
<b>Articulation Controls:</b>	All-Way® steering, Steer/Stay, Home, Fine or Coarse
<b>Lamp Control:</b>	Manual brightness and software On/Off
<b>Software Updates:</b>	Field upgradeable via removable media
<b>Remote Control:</b>	PC control via iView™ Remote XL PRO™ application
<b>Temperature Warning:</b>	Integrated camera temperature warning system

## Languages

User selectable: English, Spanish, French, German, Italian, Russian, Japanese, Swedish, Portuguese and Chinese

#### Standards Compliance

Every Measurement System is supplied with a Certificate of Compliance which indicates that the probe was manufactured and tested to measurement standards traceable to NIST (National Institute of Standards and Technology). Further, every Measurement System is supplied with a measurement verification block which contains test targets which are NIST traceable.

**ISO 9001**  
REGISTERED COMPANY

#### **GE Inspection Technologies: productivity through inspection solutions**

GE Inspection Technologies provides technology-driven inspection solutions that deliver productivity, quality and safety. We design, manufacture and service ultrasonic, remote visual, radiographic and eddy current equipment and systems. We offer specialized solutions that will help you improve productivity in your applications in the aerospace, power generation, oil & gas, automotive or metals industries.
