

VT CR series - pipe crawler

Adaptable pipe crawler with attached pan and tilt camera head and lighting

Applications and technical data

The multifunctional and adaptable crawler is designed for visual inspections of pipes. Equipped with springfeather-loaded legs the crawler adjusts itself to obstacles, uneven surfaces and changes in the cross sections. Various camera systems can be mounted to carry out high-quality visual inspections.

Features

- Easily adaptable
- Modular design
- Available for diameters between 50 and 500 mm
- Optionally watertight
- Various front cameras available (with integrated lighting)
