

# minCam

vision meets precision

## minCord

**Small, compact and usable almost everywhere.**

**Easily reach even the most inaccessible areas.**

Check completely even the narrowest spaces non-destructively and save costly dismantling.

Pipes, hollow spaces, welds, turbines, hollow beams and castings – the camera head with only 13mm diameter examines these spaces effortlessly.

At the same time, the cameras are so robust that they can easily withstand heavy duty use. Discover all surface damage, cracks, sedimentations and wear with minimum effort using this handheld inspection system.

### Specifications

- Suitable for pipes with diameters between 15 and 80mm (from DN20)
- 15m Push-Pull Cable
- Color Axial Camera Head with 13mm diameter
- Diagonal field of view of 84°
- Location sonde (33 kHz / 512 Hz / 640 Hz)
- Up to 1 bar pressureproof
- Especially durable plastic Hand Drum
- Control Unit with Function Keys
- Light Regulation
- Anti-glare 5" Monitor
- BNC Video Out
- Meter counter
- Internal Battery (5-7 hours)
